SAIBA MAIS AQUI!

ARRUELA FUNILEIRO

A diferença da arruela funileiro para os outros tipos é que ela é utilizada quando a superfície é irregular, sendo parecida com uma arruela lisa comum, porém possuindo uma aba mais larga que a das arruelas comuns.

DICA DO REI BARRA ROSQUEADA

As barras rosqueadas são usadas na construção civil, principalmente para sustentação de estruturas metálicas, dutos para sistema de refrigeração, etc. Muitos usuários cortam as barras em comprimentos conforme sua necessidade em substituição a parafusos.

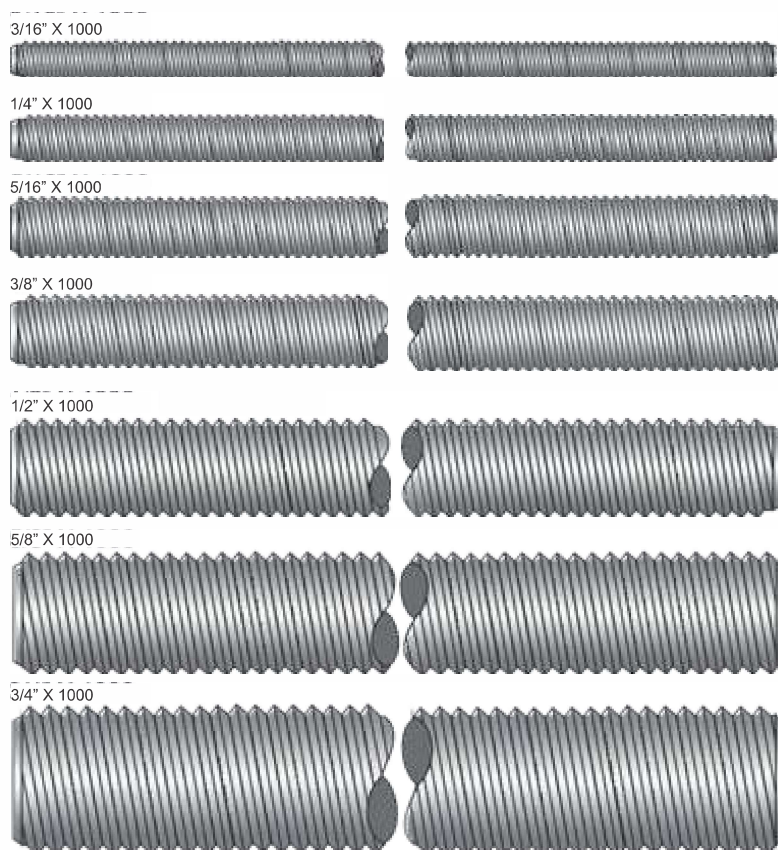

A barra rosqueada é vendida em peças de 1 (um) e 3 (três) metros, variando apenas o tamanho da bitola.

Ex.: 1/4" x 1000mm, 5/16" x 1000mm

Ex.: 1/4" x 1000mm, 5/16" x 1000mm

É fornecida sem acabamento superficial.

Obs.: Srs. Clientes e vendedores, as barras rosqueadas só poderão ser vendidas de acordo com a embalagem.

FIXADORES

DICA DO REI CHUMBADORES

Existem diversos tipos de chumbadores, cada qual sendo específico para seu tipo de uso. O modelo mais conhecido de chumbador é o parabol, que no caso é indicado para o uso direto em concreto.

O chumbador é uma espécie de haste rosca constituído de uma porca e/ou rosca e uma “camisa”, muito parecida com uma buxa de parafuso. Esta camisa, ao aplicar torque na porca/parafuso se expande, fixando-a no furo que se pretende fixar algo com o chumbador.

PBN

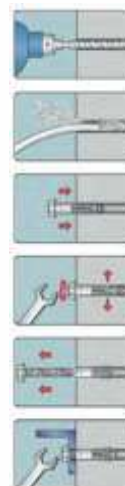

Faça um furo com broca de diâmetro igual ao diâmetro externo do chumbador.

Limpe o furo.

Introduza o chumbador com auxílio de um martelo, deixando os fios de rosca suficientes para a colocação da arruela e da porca.

Rosqueie a porca dando início a expansão da presilha. Ao encontrar resistência, sua fixação estará concluída.

CBN

Faça um furo com broca de diâmetro igual ao diâmetro externo do chumbador e comprimento indicado.

Limpe o furo.

Introduza o chumbador montado e ajustado, pronto para a expansão.

A expansão se dará de acordo com o torque que for sendo aplicado ao parafuso.

Retire o parafuso e a arruela.

Posicione o componente a ser fixado. Recoloque o parafuso e a arruela dando o devido aperto.

FIXADORES

DICA DO REI

PARAFUSO AUTO ATARRAXANTE

Muito utilizado como buchas de nylon para fixação de acessórios e diversos objetos em paredes de alvenaria, concreto, etc. Utilizado também em móveis tubulares e equipamentos fabricados com chapas metálicas finas.

O comprimento total deste parafuso não inclui a cabeça. É fornecido com acabamento superficial zincado branco.

DICA DO REI

PARAFUSO CAMA

Escala 1:1
Tamanho real

Utilizado na fixação de móveis (camas, beliches, etc).
O comprimento do parafuso inclui a cabeça, uma vez que ela fica embutida na montagem. É fornecido sem acabamento superficial, com porca retangular e arruela lisa.

DICA DO REI

PARAFUSO FRANCÊS

É utilizado em carrocerias, cercas, bancos, móveis, máquinas e equipamentos agrícolas. Inclui-se no comprimento do parafuso o quadrado logo abaixo da cabeça, que fica embutido na montagem. É fornecido sem acabamento superficial.

DICA DO REI

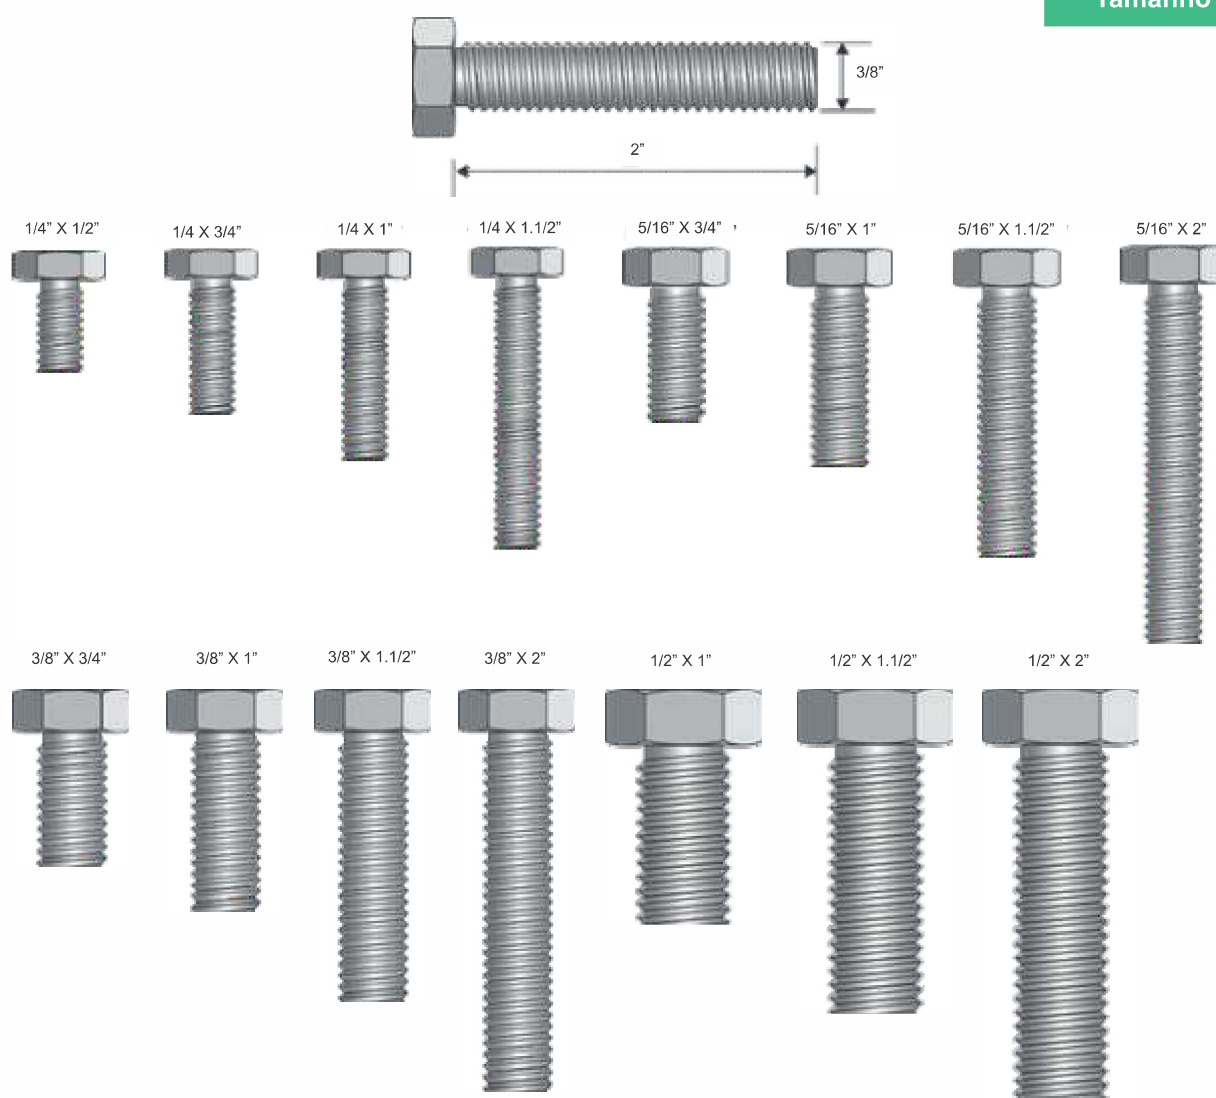

PARAFUSO SEXTAVADO

PARAFUSO SEXTAVADO - ROSCA INTEIRA

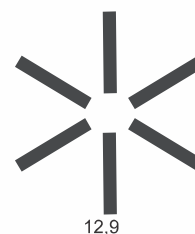

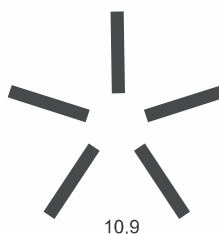

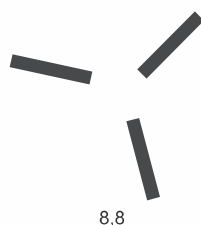

É utilizado em máquinas e equipamentos industriais, estruturas metálicas, veículos, móveis de aço e aplicações diversas.

O comprimento total não inclui a cabeça. É fornecido sem acabamento superficial.

Escala 1:1
Tamanho real

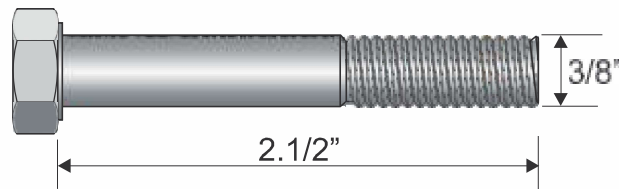

Todo parafuso de aço tem gravado em sua cabeça uma referência, que é o grau de dureza do aço.

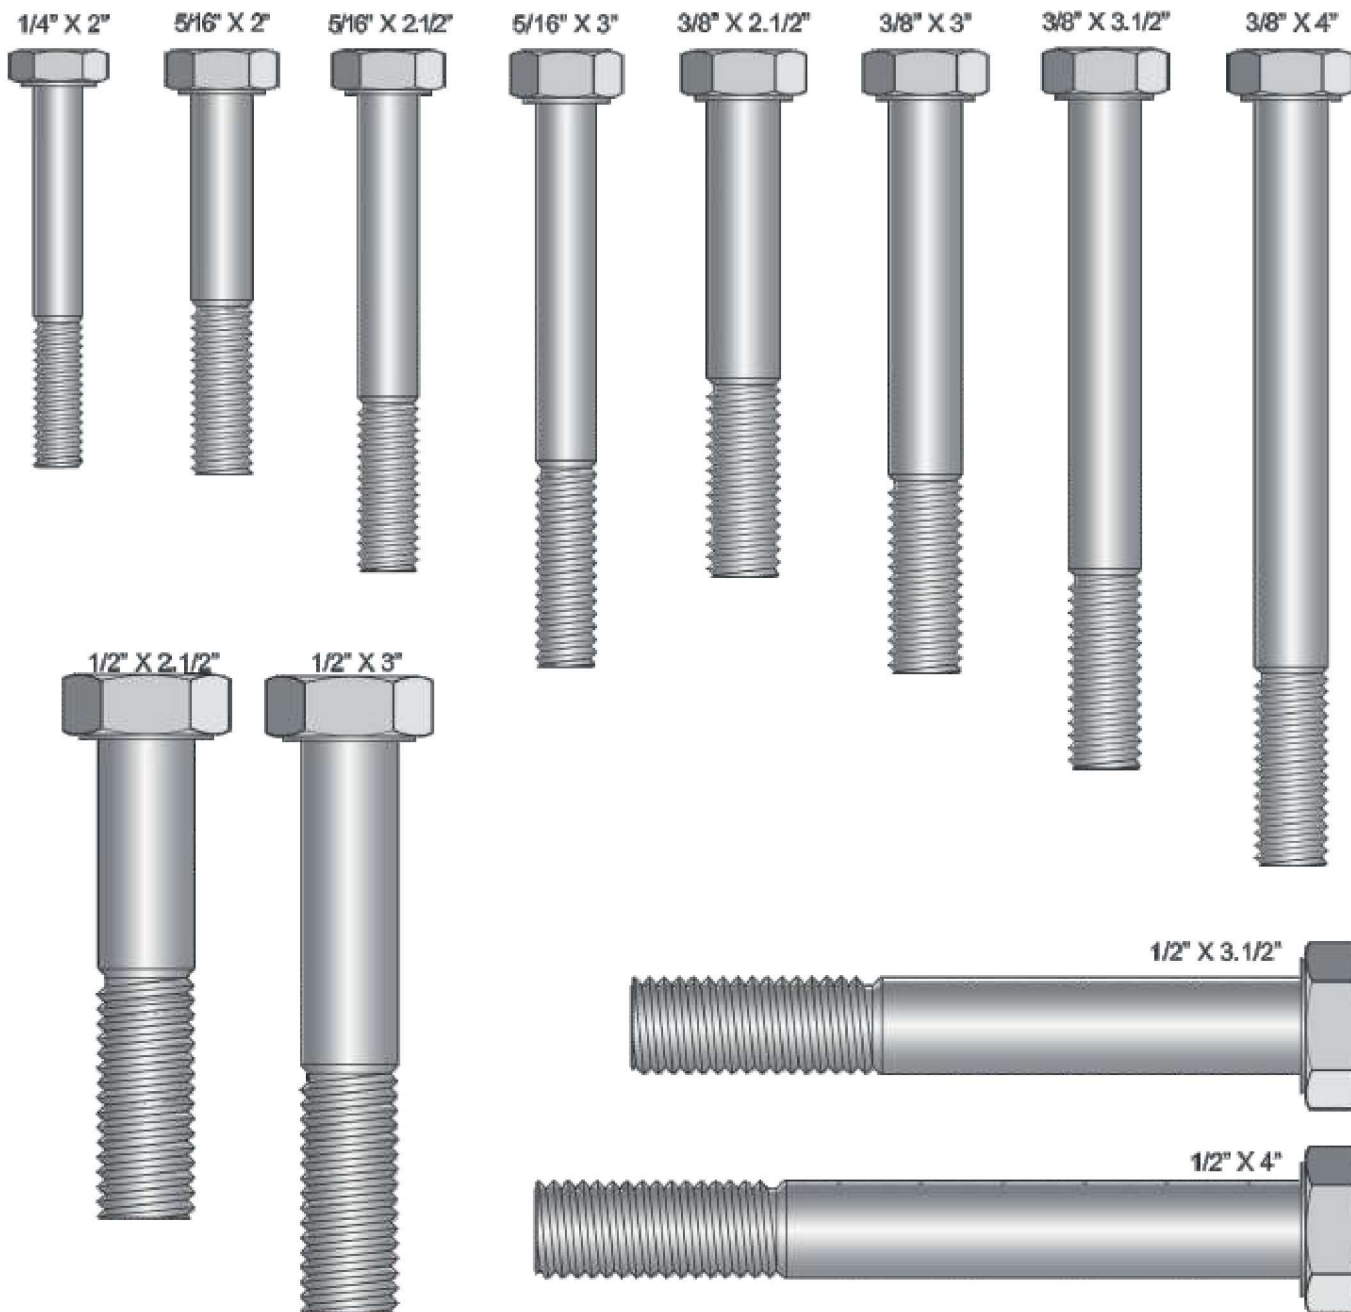

PARAFUSO SEXTAVADO - ROSCA PARCIAL

É utilizado em máquinas e equipamentos industriais, estruturas metálicas, veículos, móveis de aço e aplicações diversas.

O comprimento total não inclui a cabeça. É fornecido sem acabamento superficial.

Escala 1:1
Tamanho real

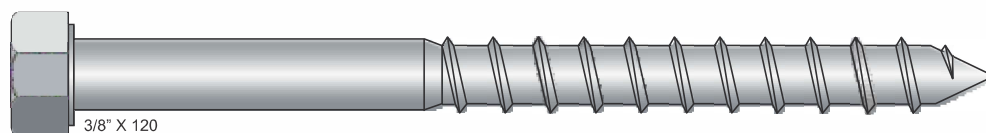

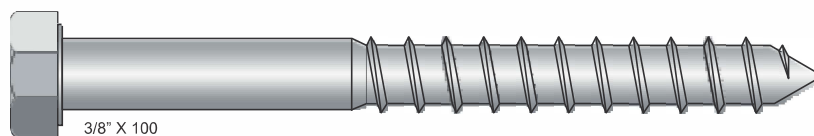

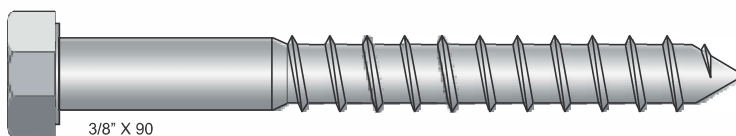

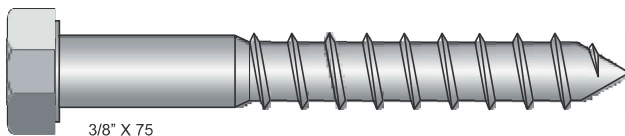

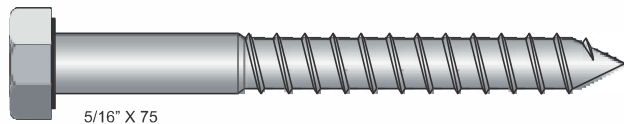

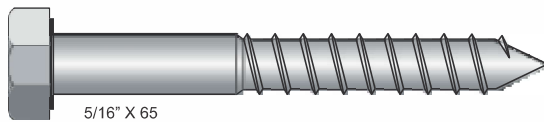

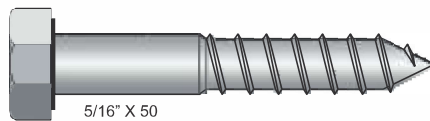

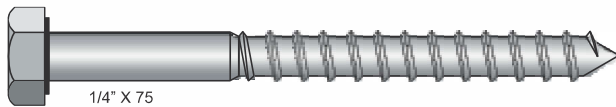

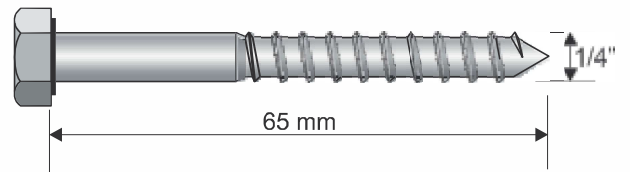

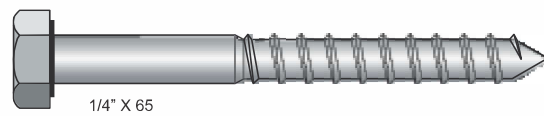

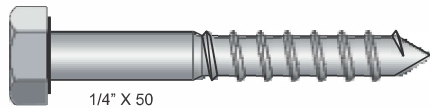

FIXADORES

PARAFUSO SEXTAVADO - ROSCA SOBERBA

Utilizado na fixação de portais, cercas, suportes para TV, vídeo, micro-ondas, etc. No concreto é utilizado com buchas de nylon.
O comprimento do parafuso não inclui a cabeça. É fornecido com acabamento superficial zincado branco.

Escala 1:1
Tamanho real

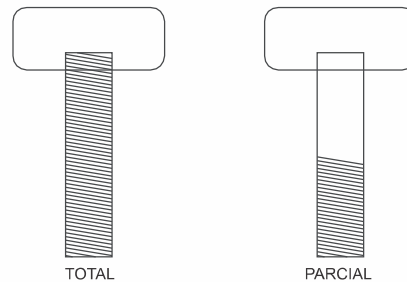

COMPRIMENTO DA ROSCA

Para definir o comprimento aproximado da rosca na ausência de paquímetro ou escala usa-se a fórmula:

Diâmetro do parafuso x2 + 6,35
 Exemplo: 10 x 50mm, tamanho aproximado da rosca 26,35mm.

DEFINIÇÃO DE ROSCA

Total: quando todo o corpo do parafuso tem rosca
 Parcial: quando parte do corpo tem rosca

TIPOS DE ROSCA

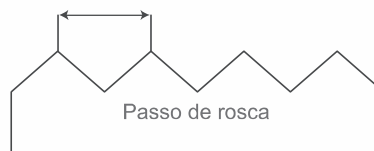

Quando a norma usada for polegada, o tipo de rosca é definido tomando por base a quantidade de fios de rosca contido em 1 polegada.

UNC = Rosca Grossa
 UNF = Rosca Fina

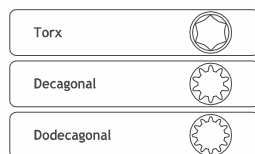

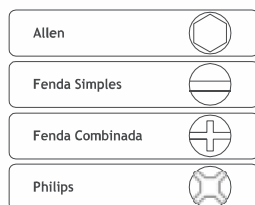

Se a norma for métrica, o tipo de rosca é definido medindo-se a distância de um dente de rosca a outro.

MA = Rosca Grossa
 MB = Rosca Fina

PORCA SEXTAVADA - ROSCA UNC

Escala 1:1
Tamanho real

É utilizada em qualquer fixador, desde que a rosca e a resistência sejam compatíveis.

A medida da porca é definida por:

- O primeiro número equivale a bitola da porca e refere-se ao diâmetro do parafuso (ou diâmetro interno da porca).
- O segundo número equivale a chave e refere-se a medida entre duas faces paralelas da porca.

É fornecida com acabamento polido (oleado).
